About Us

Who we are

As a mid-sized global biopharmaceutical company, Ipsen improves lives through research, innovation and the development of transformative medicines in three key therapeutic areas:

What we do

By improving people's lives and health outcomes by focusing on areas of high unmet medical needs, we are accelerating our momentum and rapidly boosting our pipeline to bring the full potential of our innovative medicines to patients.

Focus. Together. For Patients & Society

Focus signifies the clear and deliberate prioritization that has driven our progress in developing transformative medicines for patients with unmet needs in Oncology, Rare Disease and Neuroscience.

Together represents our approach to driving impact and improving patient care in complex, highly specialized areas. Whether working internally or with external stakeholders, we maintain our momentum through a culture of patient-centricity, collaboration and excellence.

For patients reminds us of our patient-centric approach, which is at the core of our business. By partnering across the healthcare ecosystem, we can help improve access to treatment and bring the full potential of our innovative medicines to patients.

For society reflects our responsibility as a global company to have a positive impact on the local communities in which we operate. Our social responsibility framework, known as Generation Ipsen, helps us focus on initiatives that will achieve maximum impact for society.
