Half Year 2016 Financial Results

28 July 2016

Disclaimer

This presentation includes only summary information and does not purport to be comprehensive. Forward-looking statements, targets and estimates contained herein are for illustrative purposes only and are based on management's current views and assumptions. Such statements involve known and unknown risks and uncertainties that may cause actual results, performance or events to differ materially from those anticipated in the summary information. Actual results may depart significantly from these targets given the occurrence of certain risks and uncertainties, notably given that a new product can appear to be promising at a preparatory stage of development or after clinical trials but never be launched on the market or be launched on the market but fail to sell notably for regulatory or competitive reasons. The Group must deal with or may have to deal with competition from generic that may result in market share losses, which could affect its current level of growth in sales or profitability. The Company expressly disclaims any obligation or undertaking to update or revise any forward-looking statements, targets or estimates contained in this presentation to reflect any change in events, conditions, assumptions or circumstances on which any such statements are based unless so required by applicable law.

All product names listed in this document are either licensed to the Ipsen Group or are registered trademarks of the Ipsen Group or its partners. The implementation of the strategy has to be submitted to the relevant staff representation authorities in each country concerned, in compliance with the specific procedures, terms and conditions set forth by each national legislation.

Safe Harbor

The Group operates in certain geographical regions whose governmental finances, local currencies or inflation rates could be affected by the current crisis, which could in turn erode the local competitiveness of the Group's products relative to competitors operating in local currency, and/or could be detrimental to the Group's margins in those regions where the Group's drugs are billed in local currencies.

In a number of countries, the Group markets its drugs via distributors or agents: some of these partners' financial strength could be impacted by the crisis, potentially subjecting the Group to difficulties in recovering its receivables. Furthermore, in certain countries whose financial equilibrium is threatened by the crisis and where the Group sells its drugs directly to hospitals, the Group could be forced to lengthen its payment terms or could experience difficulties in recovering its receivables in full.

Finally, in those countries in which public or private health cover is provided, the impact of the financial crisis could cause medical insurance agencies to place added pressure on drug prices, increase financial contributions by patients or adopt a more selective approach to reimbursement criteria.

All of the above risks could affect the Group's future ability to achieve its financial targets, which were set assuming reasonable macroeconomic conditions based on the information available today.

Conclusion

David Meek
CEO

H1 2016 highlights: Accelerated transformation

Solid operating performance driven by Specialty Care sales growth and in particular Somatuline® in the US

In-licensing of Cabometyx™ to strengthen oncology portfolio, recent positive CHMP opinion & launch preparation in Europe

New corporate governance model: David Meek joins as CEO; Marc de Garidel assumes the role of non-executive chairman of the Board of Directors

Ipsen: Global specialty pharma company; US now top affiliate

H1 2016 sales by segment

H1 2016 sales by geography

Top 5 affiliates

Specialty care increasing as a percentage of overall sales

Broad global footprint

US: Continued momentum and high potential for growth

- US represents 15% of global sales
- Additional growth drivers for continued momentum
- Strong leverageable infrastructure in place

H1 2016 financial highlights: Solid sales & margin improvement

Net sales
€763.8 million
sales growth +9.7%*

Specialty Care
sales growth
+14.3%*

Primary Care
sales growth
- 5.9%*

Core Operating margin
24.7%
+1.2 pt improvement

Executing on base business growth strategy

Specialty Care

Leadership in NET

- Develop Somatuline® in new indications and delivery devices
- Expand portfolio with telotristat etiprate and 177Lu-OPS201/ 68Ga-OPS202

Maximize Dysport® potential

- Launch Dysport® in new indications (PLL, ALL) and formulation
- Successful Galderma partnership in aesthetics, especially in the US

In-licensing of Cabometyx™

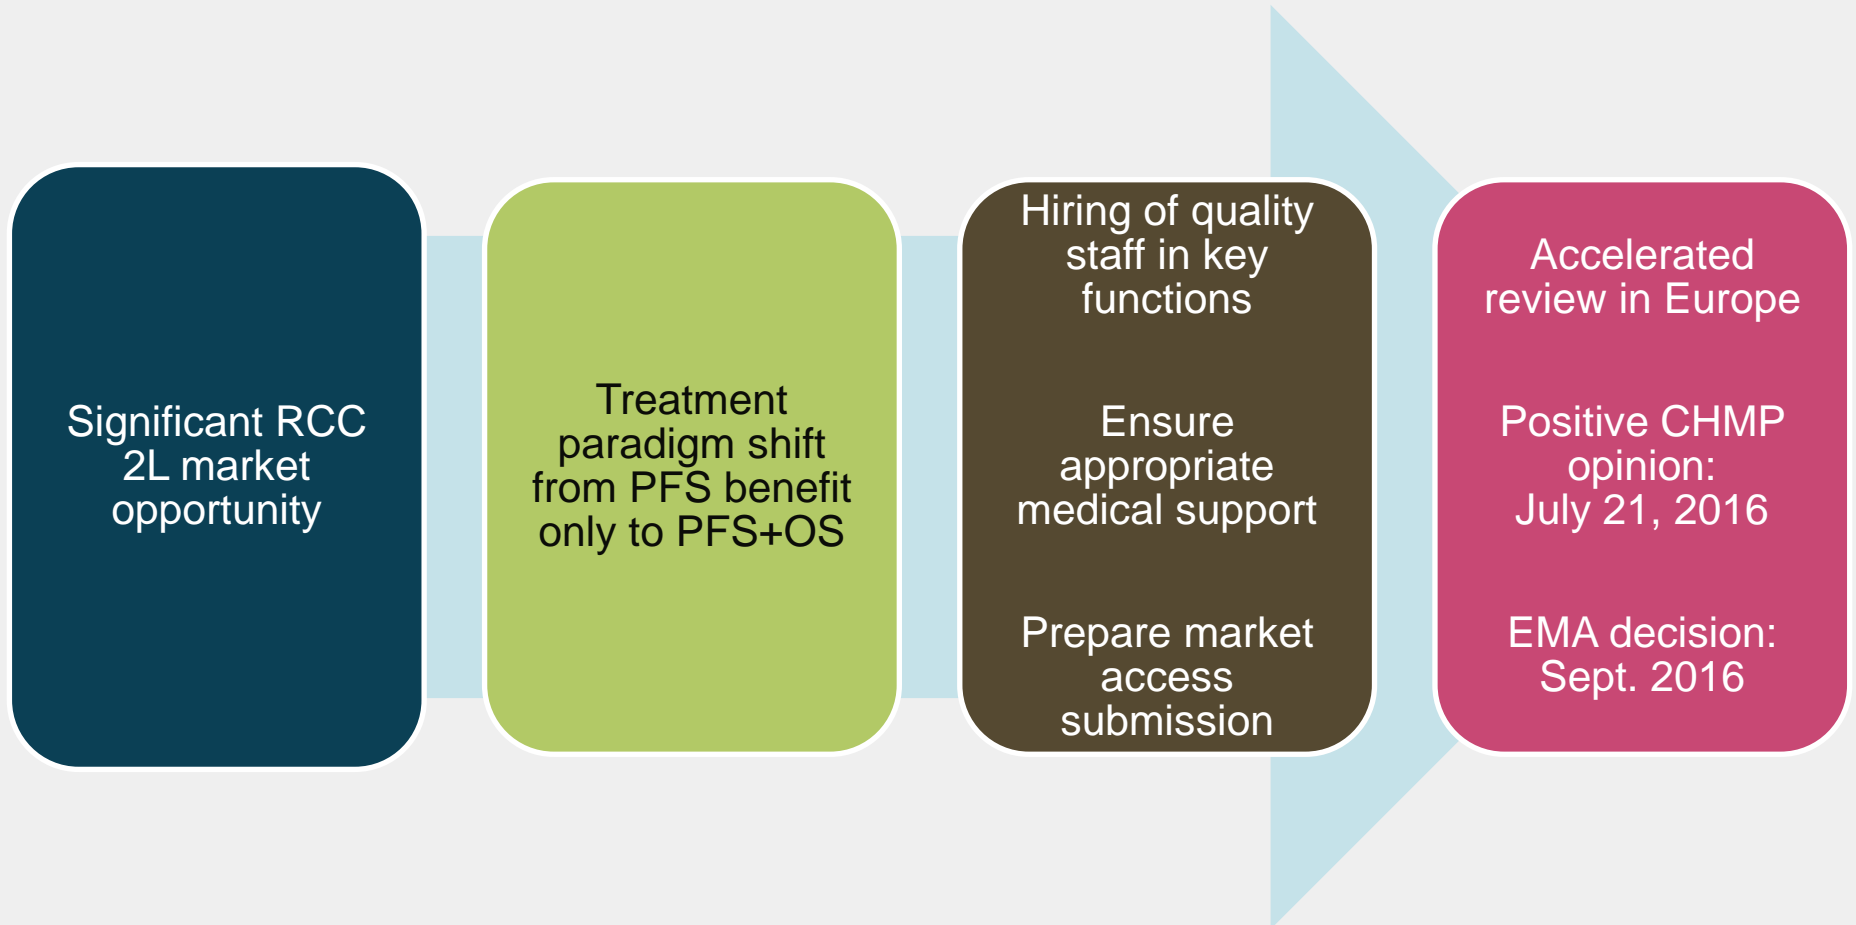

- Accelerate Specialty Care growth; reinforce niche oncology strategy
- Ensure successful launch in 2L RCC; expand in other indications

Primary Care

GI focus

- Expand portfolio of products: recent launches in France, Probi in-licencing agreement
- Transition to OTC model and continued focus in China

Cabometyx™ EU launch: Positive momentum on a significant market opportunity

H1 2016 financial performance

Aymeric Le Chatelier
EVP CFO

H1 2016 sales growth driven by specialty care business

Drug sales – H1 2016 in million euros – % excluding foreign exchange impact

Somatuline[®] NET driving Specialty Care growth

Primary Care affected by international markets headwinds, notably in China / Russia

Somatuline®: strong performance globally driving oncology franchise growth

H1 highlights

- US: Increasing penetration of centers, new patients and patients transitioning from prior therapy in an expanding market
- Continued momentum and accelerated growth in the US for NET
- Strong performance in most European countries, notably Germany, Poland, France and the UK

Source: IMS MIDAS, May 2016

* Q2 2016 market share reflects data through May 2016

Note: G5 : France, Germany, UK, Italy, Spain; EM: Emerging Markets (includes China, Russia and Brazil); NET: Neuroendocrine Tumors
* Actual sales and growth at constant FX

Dysport® driven by solid market growth

H1 highlights

- Launch of AUL spasticity (US)
 - Launch readiness for PLL spasticity (US)
-
- Continued strength of aesthetics performance in Russia and in Galderma territories
 - Adverse inventory effects in the Middle East and Brazil
 - Progressive ramp up of spasticity sales in the US

Timeline of US launches

Decapeptyl[®]: strong performance in Europe offset by inventory trends in the Middle East

H1 highlights

- Increased commercial focus in China with dedicated sales force per indication
 - Progress on potential combination in breast cancer
-
- Good volume growth and market penetration in Europe especially in Spain, France and the UK
 - Lower sales growth in China due to continued pricing pressure

Primary care impacted by Smecta® and Tanakan® slowdown

H1 highlights

- Accelerated transition in China of the Primary care model to OTx
 - Portfolio expansion with distribution agreement for probiotic LP299V® signed with Probi
-
- Smecta® impacted by 2015 destocking in China and Vietnam
 - Tanakan® market slowdown in Russia and France
 - Expected rebound in H2 2016 from OTC ramp up in China

P&L - From sales to Core Operating Income

<i>In million euros</i>	H1 2016	H1 2015	Change	% Change	Change at constant FX

Conclusion

David Meek
CEO

New corporate governance model

David Meek joins as CEO

- Joined Ipsen on July 18, 2016, based at headquarters in Boulogne-Billancourt
- Over 25 years of experience in the pharmaceutical & biotech industry, most recently leading the oncology division of Baxalta
- International and BD experience through various executive positions at major pharmaceutical and biotechnology companies

2016 roadmap

Position Somatuline[®] as a leader in NET
and secure Dysport[®] spasticity launch

Implement new Primary Care OTx model, notably in China

Prepare for the imminent launch of Cabometyx[™]
for the treatment of RCC in Europe

Continue business development to replenish pipeline
and complement marketed product portfolio

Ipsen to deliver strong growth and value creation to shareholders

Thank you
